

We are pleased to announce that **Ovohorse** will be the official sponsor of the **Moura Tours 2024** championships, a key event in the equestrian calendar.

As leaders in cellular line preservation, we are excited to offer participants an exclusive opportunity to preserve the genetic legacy of their horses.

SPECIAL DISCOUNT FOR PARTICIPANTS

During the championship, all competitors will be able to enjoy a special discount on the preservation of their horse's cellular lines.

Send an email to info@ovohorse.com with the code name **OvoMOURA24** in the subject line and enjoy the special discount.

WHAT IS CELLULAR LINE PRESERVATION AND WHY IS IT IMPORTANT?

Cellular line preservation consists of **storing your horse's genetic cells, allowing you to access advanced reproduction techniques like cloning in the future.**

This technology ensures that the genetic legacy of exceptional horses is preserved, and it can be used to maintain your horse's unique characteristics in future generations, or even to recover animals in cases of fertility problems or illness.
